

Table of Random Digits

Directions:

Place the table of random digits in front of you, and without looking at the page, place your pencil somewhere on the page. Use the number that is closest to where your pencil landed. Use this digit and the two digits that follow to the right to create a three-digit number.

- For example, if your pencil lands on the third digit in row 12, or 0, then your number is 054. You would look for the student with ID number 54 in the data handout. If the number is greater than 200, then ignore this number and repeat the process again.

Row	6	6	7	2	8	0	0	8	4	0	0	4	6	0	3	2	2	4	6	8
