

Opinion Brainstorm

Yes, ban single-use plastics	No, don't ban single-use plastics
Endangers wildlife	Non-plastic straws expensive
Bans can reduce litter A 2018 ban on plastic bags led to a 70% decrease in litter surveys	People need straws
	Producing goods = more impact than waste
	Goal = reduce overall consumption

My opinion:

We should not ban single-use plastics because they are often necessary, and banning them will not solve environmental problems.
