# TIC TAC TOE TENS GAME BOARD B (50-90)

K-2nd Grade Mathematics

TIC TAC TOE TENS GAME BOARD B (50-90)
K-2nd Grade Mathematics

How to Play:

1. Each player gets 10 two-sided counters. Choose which color each player will use.

2. Shuffle the Tic Tac Toe Tens cards (50–90) and give half of the cards to each player.

3. Players take turns. On your turn, choose a card from your hand. Find a picture on the board that matches your card. Show your card to your partner and explain why it matches the picture. If your partner agrees, place 1 of your counters on that spot.

   If you can't find a match on your turn, skip your turn and try again next time.

4. The first player to get 3 counters in a row wins the game. You can win across, up and down, or diagonally.
